This project started with a plain pool and terrace with a massive expanse of lawn and virtually no landscape design—it was a blank palette. Conte & Conte, LLC., tackled it by creating an elevated horizontal partition, obscuring the limit of the landscape beyond it, which helped create depth. Then, the team balanced the scale of the existing pool and terraces with a mirrored room: an elliptical perennial bed, and a traditional gravel Zen garden. Beyond that, on the great lawn, they built a pitcher's mound as well as a defined space for the clients' dogs behind the Zen garden.
